

Autobiography of Corona virus

①

I have mystery of my birth. Many ~~rumors~~^{Rumors} are still spreading in society ~~but~~ for my parents. But, my birth place is Wuhan city of China. You also aware about that ~~meeting~~^{Summit} which was held between the prime minister of India & President of China, that is my birth place. Some expert arguing that, I was created/generated by laboratory experiment while some believe that I came from genetic mutation ^{between} animals. Some ~~developed~~^{developed} countries ^{blaming} blaming China ~~as~~ for creating me with purpose to ^{create} slowdown in world economy.

My birth date is still not specified. There was ~~confus~~ little misunderstanding between China & WHO; as result, I ~~had been~~ ~~said~~ have compulsory satisfy with date of ~~the~~ 1 Dec 2019. ~~In~~ Earlier day I was known with name of corona virus, but later on ~~in~~ WHO ~~gives~~ gave me a new name COVID 19. Normally ~~the~~ citizens, students & debaters known me as Corona virus. From my birth to still now I am mystery for all. Experts write lots of theories on me. but not stand with full confidence on those theories for me. Let's look what those theories tell about me.

My History :-

I am from virus family. As other my ~~cousine~~ ^{cousins} ~~colleague~~, I am communicable. People ~~show~~ looks very ~~fearly~~ at me. ~~not~~ ~~My~~ In past, I ~~wass~~ my elder brother threatened world with same syndrom like me with name of SARS. (Respiratory Syndrome)

I was born in wuhan & started spreading slowly in initial ~~time~~ ^{stage}. People take me behaved ~~like~~ ^{very} casually with me. During those days, I started reproduction of myself. As other human cell; ~~we~~ I have capability to ~~inereo~~ ^{reproduce} myself in multiple order. Within ~~some~~ week to 10 days I opened my other branches in Wuhan ~~city~~. city. At that time, WHO announced me as danger for ~~city~~ country, but people still not take me seriously. They not stopped their routine life. ~~¶~~ All human kind was busy in their economic development. I took this as an opportunity & travel ~~acc~~ across the city & ~~but~~ later on I spread ~~as~~ in most tourist ~~as~~ those ~~ad~~ countries which ~~are~~ were highly dependend on international migration.

(2)

My birth country China is very ahead in trade. So, in starting I ~~to~~ infected very rich people; Later on I became the reason for death of lots of poor people, who ~~have~~ had not taken corrective action against me.

My Effect On Economy :-

As I say, I have very huge network in the world. Most of countries are worri~~ing~~ about me. There is no vaccine for me, so, all ~~the~~ human ~~is~~ fearing from me. Many countries announced lockdown in their region. It create huddle in my way because people stops their all economic activity as well as ~~social~~ all the activities which involve social gathering.

I am reason for fiscal deficit in many country. All the formal & informal workers passing their time in home. They have no any economic activity. As result, ~~exits~~ There is no income; ~~no~~ no production & that will be being result as low GDP.

Agriculture sector is still running. Farmers & their families are continuously performing their work. ~~So~~ But other manufacturing sector is stopped. Some countries, which are depend~~ent~~ on china for raw materials, can't start their production.

Many service areas which need social gathering are stopped. Banking, communication, hospitals, & other which are continuously working for welfare of the society are running.

I have stopped many Micro, small Medium Enterprises (MSME). on other hand there are lots of positive impact on economy also. I created many opportunity to develop indigenous technology. ~~for~~ ~~for~~ Many scientists, NGOs, companies get involved in Research & Development (R & D) & develop ventilator to fulfill the demand for health. I encourage many self Help Groups (SHG) for production of mask. Even many NGO take this situation as opportunity & started work for it. Recently developed countries demanded mask from India. Japan Decided to transfer their Multi National Companies (MNC) from China to other countries. India has very wide opportunity ~~to catch this opportunity~~. Even the government of Gujarat from India taken action to attract those Japanese Companies. ^{Step}

My Socio-economic effects :

③

(1) ~~Hunger~~ Hunger: Economy is stopped due to lockdown in many countries. So, people from middle class or Below Poverty Line (BPL) are started to suffering from hunger. In starting many ~~govt~~ many NGO started in started against this problem & later on government announced many ~~sar~~ scheme to give relief to their citizens. "To provide food & shelter is responsibility of country." to their citizen

~~But~~ Nobody have exact idea for my time period, so, people started to store food items. But ~~the~~ government started to provide basic commodities with Public Distribution Shop (PDS).

(2) Poverty: Economic burden increased for middle man who are engage in ~~in~~ informal work. They forced to work with very low price in farm & other sector. Government ~~announ~~ announced to transfer money to them by Jan Dhan Account. ~~this~~ ~~of~~ ~~give~~ ~~relief~~ Also, LPG gas is given free to ~~to~~ citizen beneficiary citizens.

(3) Increase Social Harmony :

Before my birth, people were very busy in their routine ~~life~~ life. They have no time to spend with their families family. But

during this lockdown people ~~started~~ ^{have} ~~to~~ have started to talk with all family members, They ^{have} started to play olden family games (indoor game like Ludo, ~~super~~ chess). Husband & wife are giving spending time with ~~their~~ each other & ultimately domestic violence are ^{is} reduced. ●

Mindset of people is greatly changed just because of me. ~~was~~ Before my birth, People were self centric & thinking about ~~their~~ themselves only but now they ~~started~~ started to think ~~in~~ for their town, city, ~~state~~ state etc.

In India, government ~~start~~ have started to casting Ramayan serial ~~that~~ ^{serial}. Most of families enjoying this serial ~~with~~ & they ~~started~~ have ~~started~~ to it effect ^{affect} positively. on society.

(4) Riots by workers: Many migrating workers demanded to go return their homestate after this lockdown in India. But government was ~~try~~ trying to stop ~~this~~ my spreading ^{area} by stopping all transportation services. On other side, some industrialist & NGO become unsuccessful to full fill the workers basic need. As result ~~this~~ that lead to riots in many areas by workers. Later on government open bus & railway service for them.

My Environmental Effect :-

(4)

Although I have many negative dimensions for human beings, but I play pivotal role in reduction of pollution. I opened doors for many ~~Species~~ ^{species} for their development. Let's analyse my effect one by one ~~on~~ my effect on environment.

(1) Air pollution : Delhi was very polluted in term of air pollution before lockdown. But, Now according to data, Pollution level is decreased. Many chimneys of industries stopped their production of fume & ultimately, I become reason for clean sky for birds.

(2) Water pollution :- According to reports on ~~rivers~~ Ganga & Yamuna rivers, the water Pollution level is decreased. Fishes & other aquatic ~~species~~ ^{species} enjoying this lockdown happily. Turtle species on the coast of Odisha continuously enjoying this ~~no~~ human free sea-shore. Many rivers ~~are~~ ^{had} ~~been~~ polluted by the chemical & ~~other~~ ^{non} ~~filtered~~ waste dumped ~~on~~ ⁱⁿ it, but nowadays the pollution level is decreased.

(3) Noise pollution : ~~Many~~ In starting, bus service, Rail service, airplane services were stopped by many countries, that results in reduction in noise pollution, specially those areas which nearer to highway, railway station & air port.

(5) Increase in Bio-diversity :- This lockdown will create many opportunities to critically ~~da~~ endangered, vulnerable & endangered species for ~~their~~ increment in their population.

(6) Meat production & egg :- People are very fearing from me. Many of them changed their diet. People continuously refusing to eat egg & meat with fear of mine. They shifted on vegetable. Dem So, from food safety point of view, this will increase demand of agriculture products, ^{So} India need to import more from the other countries.

What will be my future?

⑤

According recent research, no country have vaccine which protect citizen from me. People can take preventive action by using mask, social distancing etc, but they will not enjoy that much of freedom which they were enjoying before my birth. My ~~past~~^{elder} cousin ~~plague~~^{plague} which is from virus family, killed approx 5 crore people at that time. I think I will be danger compare to it, if people can't not focus on preventive actions.

Scientists & researchers arguing that they will find vaccine for me within 18 months, but, I think that is very long period for me to develop myself. People need to also think for my other cousin HIV; I think, more than 40 years passed, ~~at~~ but still scientists have no vaccine for it. As per me, people have no any option rather to adopt hygiene practice in their life to protect themselves from me.

Mutual understanding in all the action of people ~~we~~ can ~~oppose~~ ~~me~~ prevent themselves from me. — Bakul Kumar Khariya 07/05/2020
